

## About NWM 2023

Modern welding is about welded structures and components meeting the stringent requirements of service at optimum cost. To fulfill the above objective, qualitative and quantitative assessment, through non-destructive as well as destructive evaluation, is adopted.

In many welded structures one encounters distortion primarily due to residual stresses arising out of thermal and/or metallurgical changes. Mitigation of the same is of keen interest to a welder.

Similarly, life of component or structures worn out during service can be rejuvenated through welding based repair and reclamation using defined methodology and procedure.

Again, in the present digitized advanced manufacturing context of - *Industry 4.0* (the fourth industrial revolution) data analytics and large scale automation is becoming an important part of welding.

Keeping the above aspects in view, the NWM-23 would cover the following areas:

- ❑ *Quality Assessment*
- ❑ *Welding distortion and its Mitigation*
- ❑ *Reclamation and Repair*
- ❑ *Industry 4.0*
- ❑ *Training*

## Who will benefit

Experts in welding, reclamation, and repair from both industry and academia will discuss about the state of the art in welding. Both students and welding professionals will benefit from this meet.

## Attractions

Bhubaneswar the capital city of Odisha is very near to historic places like Konark and Puri as well nature reserves like Chilika lake.

## About IIW-India

The Indian Institute of Welding (IIW-India) is a premier professional body of welding fraternity, devoted to the promotion and advancement of welding science and technology. It was established on 22nd April 1966, with its registered office at Kolkata. Presently IIW-India is having 13 branches, 2 Centres and 20 Students' Chapters all over India. It has about 4500 members & over 150 industries as Industrial Corporate Members. IIW-India publishes Indian Welding Journal, which has technical research papers of high standards. IIW-India is a member society of the International Institute of Welding, and has acquired the status of Authorised Nominated Body (ANB) to award internationally accredited professional Diplomas such as International Welding Engineer (IWE), International Welding Technologist (IWT) etc., and also acquired the status of Authorized Nominated Body for Company Certification (ANBCC) to certify Industries as per ISO 3834. IIW-India also conducts its own welder certification programme, under National Welding Training and Certification Scheme (NWTCS).

It is also empanelled by NSDC as the "Assessing Body" for Certification of welders under PMKVY schemes for various Sector Skill Councils. IIW-India organizes International Congress (IC), National Welding Seminar (NWS) and National Welding Meet (NWM) where a number of Indian and foreign authors delivers their work on the recent developments of welding science and technology. The institute also recognizes authors with different awards and also conducts national skill competition to encourage the welders and welding engineers. IIW-India also offers a platform for Young Professionals and specially for the Women Professionals to boost them to excel their career in the field of Welding and to materialize the motto of "Welding for Nation Building" .

## About IIW-India Bhubaneswar Centre

IIW-India Bhubaneswar Centre is affiliated to the IIW-India Kolkata Branch and came into being around 15 years back. The idea of bringing about the Centre was to provide a platform for the practicing welding specialists in industries and academia (with a large number of engineering colleges) in Odisha together, for exchange of ideas and in the process enriching the profession of welding, taking advantage of the large pool of experts available in IIW-India. Additionally, the Bhubaneswar Centre is also engaged in inculcating an interest for welding as a profession among the engineering students.
