About IIW-India

The Indian Institute of Welding (IIW-India) is a professional body devoted to the promotion and advancement of welding science and technology in India. Established in 1966, with its registered office at Kolkata, it has fourteen branches and over 5000 welding professional members and 130 Industries as corporate members. IIW-India is involved in human resources development in welding in India by carrying out training and certification of engineers and welders in India in the International standards; Technology diffusion to the industry and to the welding community through seminars, workshops, training programs, providing technical guidance and consultation to industries in welding, conducting associate membership examination and awarding IIW diplomas. The IIW-India has been recognized as an Authorized National Body (ANB) to carry out certification program of the International Institute of Welding.

One-Day Welding Course (Tamil & Hindi)

Welding plays a key role in every manufacturing process in a wide range of industries. To run in the global competition, industries are looking for enhancing the quality of their product. One of the ways of enhancing quality is by improving the practical and theoretical skill of welders. The situation today is there is a lack of quality manpower. The IIW-India has realized this acute problem and has encouraged its Branches to conduct courses and training programs for welders, welding operators, welding supervisor, welding inspector and welding engineers in their native languages. As a part of this exercise, the Chennai Branch of the IIW-India has decided to conduct a One-day Welding Course in Tamil and Hindi languages in separate halls. The Course material / PPT in English. Explanations by the speakers are in Tamil and Hindi.

There will be invited lectures by eminent people from research & educational institutions and industries on the following topics:
